

# Lucas Hubert

iOS Developer | Swift Expertise | Xcode Proficiency | MVP Development

+55 47 991 500 721 lucasjhubert@gmail.com <https://www.linkedin.com/in/lucashubert/> Brazil

## SUMMARY

Innovative iOS engineer with over 8 years of software development experience and deep expertise in Swift, UIKit, and SwiftUI. Skilled in API integration, modular architecture, and advanced UI/UX design with a proven track record of enhancing app performance and user engagement. Adept at implementing clean code principles and agile methodologies to deliver scalable, maintainable mobile solutions. Seeking to leverage technical proficiency and problem-solving skills to drive impactful iOS development projects.

## KEY ACHIEVEMENTS

### Figma Design Execution

Implemented Figma design translation into Swift, improving UI consistency across platforms by 40%.

### REST API Optimizations

Integrated REST APIs for Natura's app, reducing data retrieval times and enhancing user engagement.

### User Experience Enhancement

Transformed user experience for Uber Conta, increasing loan contract through strategic UI redesign.

## EXPERIENCE

### Senior iOS Developer

#### Nexos Digital

Belo Horizonte, Brazil

06/2025 - 02/2026

Remote. Collaborated to Interbank super app, developing SDUI platform with Kotlin for server-side UI. Built backend factories for screen creation using Design system components, enabling user interaction events.

- Decreased the new release needs, the server built the native app screen
- Improved the control and fixed speed
- Kept the application full Native

### Senior iOS Developer

#### Plus

São Paulo, Brazil

11/2024 - 02/2025

Remote Part-time. Worked on Loan Team on Uber Conta, an Uber app bank managed by Digio Bank, developing new features to improve the contracting of loans and fix view issues.

- Developed unit tests for all Loan Module, from zero to top test coverage.
- Implemented push notifications for recurrence charge.
- Fixed PIX QRCode issues.

### Senior iOS Developer

#### SysMap Solutions

Curitiba, Brazil

03/2022 - 12/2025

Enhanced the Natura consultant app with new functions for users in Brazil and globally. Refined existing features for better UX and integrated payment SDKs for seamless transactions.

- Developed iOS app using Swift and Objective-C languages.
- Managed order handling for Natura Consultants, administering the order using CoreData.
- Processed the Cart, Gifts and promotions, delivery, payment and confirmed order screen.
- Implemented new features, refactored, created UI tests, and conducted unit tests.
- Utilized Clean Code and SOLID principles, applied View code programming, and employed MVVM.
- Applied Agile Methodologies like Sprints, Daily's, Planning, and Kanban Board.

### iOS Developer

#### BTG Pactual

Curitiba, Brazil

07/2021 - 03/2022

Remote. Enhance BTG Bank app with innovative features. Implement document validation, resolve issues, and optimize documentation & identity modules.

### iOS Developer

#### Cielo

São Paulo, Brazil

12/2020 - 07/2021

Remote. Develop and refine the application to launch to production. Was a wallet app to manage payments from POS Terminal.

- Redesigned the login and password flow for a seamless and secure user experience.
- Streamlined the account opening process for greater efficiency and user satisfaction.
- Implemented the Brazilian digital payment method (PIX).
- Upgraded onboarding experience for Cielo customers, incorporating innovative features.

### iOS Developer

#### Banco Original

Curitiba, Brazil

05/2020 - 12/2020

Enhanced account opening at Original Banking with advanced facial recognition and fine-tuned image processing, boosting security and efficiency. This tech-driven update ensures a secure, seamless customer experience while saving time and effort.

- Developed and optimized facial recognition and image processing features, supporting account openings.

## EXPERIENCE

### iOS Developer

Curitiba, Brazil

[Veloce](#)

11/2019 - 05/2022

Managed Veloce app, a bug-prone toll manager. Refactored in Kotlin for Android & Swift for iOS. Ensured app continuity during native development to aid business income. Accepted role to transition to iOS development.

- Resolve the production's payment issues and enhance the payment experience

### Frontend Developer

Curitiba, Brazil

[Snowman Labs](#)

11/2018 - 11/2019

Development of web platforms for healthcare and banking systems, based on strong user experience, responsiveness, performance and security.

## EDUCATION

### Bachelor System Information

01/2016 - 12/2021

Católica de Santa Catarina

### Systems Engineering

01/2018 - 12/2020

SENAI - Jaraguá do Sul

### Bootcamps

01/2016

Rocketseat

## LANGUAGES

English (Proficient)

Português (Native)

Spanish (Beginner)

## PROJECTS

### ShareGram - Social app based on Instagram

An app to share images and follow other accounts, working like Instagram. Using Firebase Services

- Database on Firestore
- Manage Image storage
- Realtime chat
- Image uploads
- Navigation using bottom bar

### eUber - Uber based SwiftUI app

App developed based on Uber app to get rides, using SwiftUI and MapKit Apple SDK. In this app you can look these features:

- Updated search locations in real-time integrating dynamic maps.
- Calculated ride time and cost based on distance and coordinates.
- Supported multiple ride types with intuitive interface options.
- Implemented route line drawing and destination pinpointing features.
- Enabled dark/light mode for user interface adaptability.
